Please read the following information carefully. It describes important information about your prescription drug coverage.

What's changing

Beginning August 1, 2014, Incivek will be considered non-preferred brand or not covered. Depending upon the benefit plan, Incivek may be subject to additional requirements such as prior authorization.

Medication now considered non-preferred brand

Incivek will be considered non-preferred brand and may be subject to additional requirements such as prior authorization. Please note: Cigna does not cover the use of telaprevir (Incivek®) or boceprevir (Victrelis®) because it is no longer recommended therapy for hepatitis C infection by the American Association for the Study of Liver Diseases and the Infectious Diseases Society of America.

* In accordance with Texas and Louisiana state law, customers with affected benefit plans who receive coverage for medications that are removed from the Prescription Drug List during the plan year will continue to have those medications covered at the same benefit level until their plan renewal date.
