Copaxone® 20 mg Billing Unit Changes

Effective September 25, 2014

September 18, 2014

Dear Valued Provider,

A new package configuration for Copaxone® 20mg NDC 68546-0317-30, which no longer contains alcohol swabs or any other prepping supplies, was introduced in Q1 2014. A new National Drug Code (NDC) was not required by the FDA for this new package configuration.

This change will require pharmacies to change how this drug is submitted for accurate claims adjudication and payment. To remain in compliance with the NCPDP Billing Unit of Standard, the billing unit will change from 1 EA kit to 1 ML per syringe (package size of 30).

Action Required

Effective September 25, 2014, all Copaxone® 20mg claims require the new billing unit of ML. Below is an example of how a claim should be submitted for all dates of fill for September 25, 2014 and after:

Claim Billing Field	Post Change:		
Quantity Dispensed (442-E7)	30.00	60.00	90.00
Days Supply (405-D5)	30	60	90
Ingredient Cost Submitted (409-D9)	\$5000.00	\$10,000.00	\$15,000.00

If you have questions regarding claims processing, please contact Prime's Contact Center at 1.800.821.4795.

Sincerely,

Pharmacy Network Management
