"I am a working parent of 4 kids and when I heard about the home strep kit, I had to get it! Do you know how many times I've gotten home to hear one of my kids complaining of a severe sore throat? Now I don't have to guess about the severity, or wonder whether a run to the urgent care or doctor is needed. This product really eases my mind and I feel good to know I am ready in case strep decides to pay us an unexpected visit. Thank you Physician 360!"

**- Karin S.**

"There are so many things I love about this. The kit is so affordable and gives me invaluable peace of mind – from the convenience of knowing I won't have to take a sick kid to the doctor's office and risk exposing them to other illnesses to knowing my family and I can still get care when we are traveling without access to our family doctor. I cannot afford NOT to have a few on hand wherever we are."

**-Kathy F.**
